

Summary of Weekly Petroleum Data for the Week Ending June 29, 2012

U.S. crude oil refinery inputs averaged 15.6 million barrels per day during the week ending June 29, 14 thousand barrels per day below the previous week's average. Refineries operated at 92.0 percent of their operable capacity last week. Gasoline production increased last week, averaging 9.4 million barrels per day. Distillate fuel production increased last week, averaging 4.7 million barrels per day.

U.S. crude oil imports averaged 8.8 million barrels per day last week, down by 344 thousand barrels per day from the previous week. Over the last four weeks, crude oil imports have averaged 9.1 million barrels per day, 16 thousand barrels per day below the same four-week period last year. Total motor gasoline imports (including both finished gasoline and gasoline blending components) last week averaged 823 thousand barrels per day. Distillate fuel imports averaged 81 thousand barrels per day last week.

U.S. commercial crude oil inventories (excluding those in the Strategic Petroleum Reserve) decreased by 4.3 million barrels from the previous week. At 382.9 million barrels, U.S. crude oil inventories are above the upper limit of the average range for this time of year. Total motor gasoline inventories increased by 0.2 million barrels last week and are below the lower limit of the average range. Finished gasoline inventories increased while blending components inventories decreased last week. Distillate fuel inventories decreased by 1.1 million barrels last week and are below the lower limit of the average range for this time of year. Propane/propylene inventories increased by 0.9 million barrels last week and are above the upper limit of the average range. Total commercial petroleum inventories decreased by 4.1 million barrels last week.

Total products supplied over the last four-week period have averaged 19.2 million barrels per day, up by 0.9 percent compared to the similar period last year. Over the last four weeks, motor gasoline product supplied has averaged 8.9 million barrels per day, down by 4.3 percent from the same period last year. Distillate fuel product supplied has averaged 3.7 million barrels per day over the last four weeks, up by 3.8 percent from the same period last year. Jet fuel product supplied is 11.1 percent higher over the last four weeks compared to the same four-week period last year.
